

Project Design Phase
Proposed Solution Template

Date	19 July 2026
Team ID	
Project Name	AI-Driven Emotion Detection & Personalized Learning Support Platform
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Develop an AI-powered web application that detects students' emotions from text input using machine learning models such as BERT and BiLSTM. Based on the detected emotion, the system provides personalized learning guidance and motivational suggestions using the Gemini API. The platform also maintains interaction logs and displays analytics through a Streamlit dashboard to improve students' learning experience.
2.	Idea / Solution description	AI-powered platform that detects students' emotions from text input using BERT and BiLSTM models and provides personalized learning guidance through the Gemini API.
3.	Novelty / Uniqueness	Combines emotion detection, AI-generated learning support, analytics dashboard, and real-time personalized recommendations in a single platform.
4.	Social Impact / Customer Satisfaction	Helps students overcome learning difficulties, improves motivation and learning outcomes, and provides a more personalized educational experience.
5.	Business Model (Revenue Model)	Freemium model with premium subscriptions for advanced analytics and institutional licensing for schools and colleges.
6.	Scalability of the Solution	The platform can be scaled to support thousands of users and integrated with Learning Management Systems (LMS) for schools, colleges, and online learning platforms.
